Our Aim

At Little Bear's our aim is to provide a warm, loving, safe and stimulating environment for our children to learn and develop whilst following the Early Years Foundation Stage Curriculum. Our qualified and experienced staff members have been chosen because of their enthusiasm for working with children.

Our Approach

The emotional well-being of the children is as high on our agenda as safety aspects; and, our aim is produce a home style environment to encourage the children to explore and learn but also to develop a positive image about themselves.

We operate a 'Key Worker' system enabling your child's progress and needs to be carefully monitored, as well as being an immediate point of contact for parents.

Our Environment

The nursery is made up of three themed rooms set aside for specific age groups. Each room has an area for sleep / quiet time, as age appropriate, as well as plenty of space to play. The nursery boasts a large garden with a variety of outdoor equipment.

Meet some of Little Bear's team.....

Research has shown that children learn best and acquire new skills through carefully thought out structured play.

The rooms are well equipped with age appropriate toys and activities set out to encourage experimentation.

An All-inclusive Provision

We provide an all-inclusive service for parents providing Huggies™ or Pampers™ nappies, wipes, creams and formula milk. Parental wishes as per feeding and nappy changing are of paramount importance to us and we will endeavour to follow parental requests.

Parental Partnership

Our aim is to develop and foster a close working relationship between parents and staff. This involvement is essential for the development of the child both emotionally as well as academically. Daily dialogue with your child's key worker is our primary means of communication.

What's next.....
